OBJECTIVE

Desired Position: Middle Front End Developer

I started learning Front End in 2014. Since that time got experience with **Digital Marketing (2 years)** and **ECommerce (1.5 years)** projects. During my career I worked with the projects of different sizes and teams, most often with Scrum methodology.

I have a solid knowledge of common FED languages and such frameworks as **VueJS** and **Angular**. I always follow trending FED technologies and ready to implement them in the projects I am working on.

In future I investigate the possibility to grow into **Full Stack Developer** and to achieve it I started learning **Java** and Back End technologies in free time.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, EcmaScript

Libraries: jQuery, Bootstrap

Frameworks: VueJS, AngularJS, Angular2

Preprocessors: LESS, SASS, SCSS

Task Runners: Gulp, Grunt, WebPack

CMS: Hybris, Wordpress

VCS: Git, GitHub, BitBucket

External sevicees and APIs: Google Maps, Google Streets, Google Geolocation, Google Analytics, Google Tag Manager, Smarty Streets, Bazaarvoice, SalesForce, Hotjar

Workflow technologies: Jira, Confluence, Scrum

IDEs: IntelliJ IDEA, WebStorm, Sublime Text 3

Other technologies: BEM, Website Adaptivity and Cross-Browser Compatibility

EDUCATION

2011 – 2017. Ukraine, Kiev, National Aviation University. Higher, Specialist. Speciality: "Electronic Devices and Systems"
